I oppose HR 4026 in its' attempt to keep me from getting vital traffic and weather information from my XM radio. I cover 30 states as a technician nad depend on the comprehensive weather and traffic that I am able to receive through my satellite radio. I find that the next most frequent traffic report in the Chicago area is only every ten minutes, and they do not include side streets or local routes. With XM radio I can get my traffic instantly whenever I choose. XM radio has reports that include local roads in my area 60 miles from Chicago. Please don't take away my rights to use this service that I choose to pay for
